

Computing Intent Statement

Through our computing curriculum at The Merton Primary School we aim to give our pupils the life-skills that will enable them to embrace and utilise new technology in a socially responsible and safe way in order to flourish.

We want the use of technology to support learning across the entire curriculum and to ensure that our curriculum is accessible to every child.

Not only do we want them to be digitally literate and competent end-users of technology but through our computer science lessons we want them to develop creativity, resilience and problem-solving and critical thinking skills.

We want our pupils to have a breadth of experience to develop their understanding of themselves as individuals within their community but also as members of a wider global community and as responsible digital citizens.
