

Year 4 - Autumn 1 Computing Knowledge Organiser: The Internet

What I already know...

- That the internet allows people to share information.
- That the internet can be a positive thing but that there are also dangers associated with its use.

What I will learn...

- How to stay safe online and how to report any issues.
- Some of the positives and negatives of the internet.
- What information is ok to share and which information should be kept private
- That it is important that adults who look after me know what I am doing on the internet

Key Vocabulary

Filter	A programme that can be used on photographs or video to alter how they look.
Filter	Something that can be used to stop some harmful or upsetting information from getting to the user.
Media	A way of communicating with lots of people
Misleading	Information that is designed to make you think something that isn't true
Fake News	A popular term for information that is misleading

Making a difference at The Merton and beyond

Staying safe on the internet is a vital life skill.

Children will be taught why it is important to keep themselves safe and how to do so to enable them to use the internet safely.

Computing Skills

Disciplinary Knowledge: Computing skills I will learn...

- E-Safety (SMART skills)
- How parental controls work
- How privacy settings work
